Proposed Agenda and Amendments

SN 10/754,012

Agenda

-Discuss 102 rejections in view of proposed amendments to claims

Proposed Amendment to claim 1

1. (Currently Amended) A method of managing a plurality of software development environments coupled to one another through a cross development environment, the method comprising:

receiving a first problem report from a first problem tracking tool in a first software development environment among the plurality of software development environments, wherein the first problem report has a first format associated with the first problem tracking tool;

in response to receiving the first problem report, converting the first problem report into a second format associated with a second problem tracking tool in a second software development environment among the plurality of software development environments using a mapping configured to convert problem reports in the first format into the second format;

forwarding the converted first problem report in the second format to the second problem tracking tool;

after forwarding the converted first problem report to the second problem tracking tool, detecting an update made in a the first software development environment among the plurality of software development environments, wherein the update made in the first software development environment includes a change to the first format; and

dynamically modifying a the mapping between the first software development environment and a second software development environment among the plurality of software development environments in response to the detected update;

receiving a second problem report from the first problem tracking tool, the second problem report formatted in the changed first format;

in response to receiving the second problem report, converting the second problem report into the second format using the modified mapping; and

forwarding the converted second problem report in the second format to the second problem tracking tool.
